

# MANAGED NETWORKING

Part of the Cloud product family

## The Service

As a business you cannot afford downtime and you need the reassurance that the network will be there when you need it.

The network is the backbone of 21st century business and when it goes down, business stops, communication stops, transactions stop and money is lost. Managed Networking is a cloud based service delivering uninterrupted operation + maximum uptime.

Highly reliable network services can be deployed at scale in a matter of minutes, allowing your business to work seamlessly and more importantly without any network related downtime.

## The Features

**Customer cloud portal**

**Fully integrated 4G LTE failover**

**Fully integrated cloud based management**

**Service Desk support**

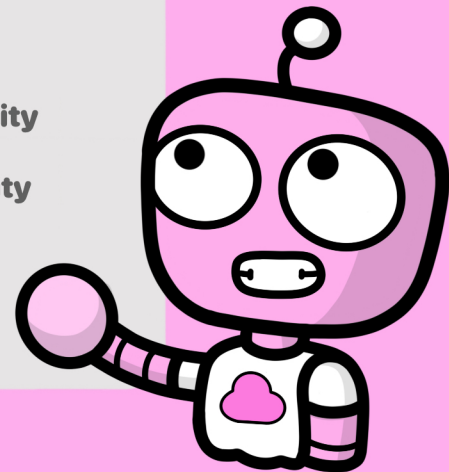

## The Benefits

**Fast deployment**

**Easy setup**

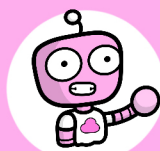

**Network continuity**

**Advanced security features**
