

SAFEGUARD

Part of the Protect product family

The Service

Safeguard is a cloud based Device + Data Security (DDS) service, full managed by PCS. This solution provides powerful capabilities, to see + secure endpoint devices + data stored on insecure laptops or mobile devices.

The service features an easy to use Security Vitals Dashboard, allowing you to instantly assess your security posture and take proactive steps to repair endpoint agents + reduce blind spots. With this visibility into crucial device, data, application + user telemetry, you can identify + respond to risks early and prove compliance, in the event of a security breach.
