

# WEB PROTECT

Part of the Protect product family

## The Service

Web Protect provides the ability to block illegal + untrustworthy websites, protecting your business and your users. It also protects against websites that may push harmful programmes including malware, phishing, proxies, spyware, botnets + spam.

Web Protect allows internet browsing rules to be applied, so you can ensure that productivity remains high, by implementing time based browsing or schedules browsing of non work related websites. All rules can be applied across departments or to a specific individual, enabling you to intelligently filter internet activity.

## The Features

**Schedule the blocking + unblocking of websites**

**Set alerts to keep bandwidth usage in line with thresholds + policies**

**Set individual or group based web viewing policies**

**Additional layer or protection from potential internet derived cyber security problems**

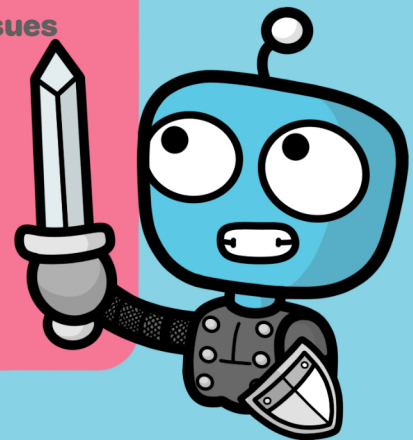

## The Benefits

**Increase productivity levels**

**Improve network protection**

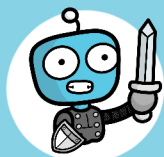

**Prevent liability issues**

**Fully managed by PCS, with service desk liaison for your business**
