

# CLOUD CONNECT BACKUP

## Why choose PCS Cloud Connect Backup with Veeam

Cloud based backup has become a go-to solution for an organisation that wants to protect its assets.

But... all clouds are not created equal.

Global site options, top tier networks and 100% availability are key to a successful backup strategy.

## Why choose PCS as your Veeam Cloud Connect target?

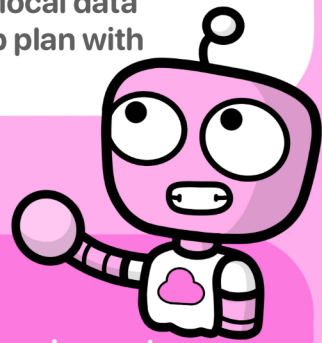

Provides access to an up-to-date copy, or secondary copy, of your virtualised applications in our cloud, restoring files and virtual disks back to your local environment as needed.

PCS Cloud Connect Backup (BaaS) enables organisations to utilise our local data centres, and Tier 1 network providers, to have a strategic off-site backup plan with optimised access.

## Flexible software-defined networking

Recognised by analysts to be the leading provider of disaster recovery solutions.

Whether a backup or full replication, PCS provide best in class customer service and professional services that guide you through cloud-based data protection planning.

## Unmatched visibility + management

PCS provides the unique capability to monitor and manage your Veeam Backup solution through our Secure Cloud Console. As an intuitive, self-service interface its powerful features enable users to: →

Monitor cloud storage usage

Receive utilisation alerts

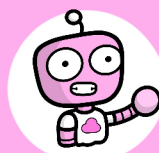

Proactively scale up resources on demand

Gain insight into billing information

Use analytics to accurately forecast future backup storage needs
